

UV Adhesive incl. UV lamp | bottle 3 g

Product number: 80854

Weight: 0.028 kg

EAN: 4048769036201

- suitable for gluing jewellery glass, lead crystal glass, also laminated glass (for example, car window panes and car rear-view mirrors)
- not suitable for aquariums
- the adhesive automatically hardens under UV exposure by the included UV lamp, or by direct sunlight.
- suitable for gluing, fixing, sealing, repairing, securing, filling, sealing, modelling, insulating
- bonds clear glass, plastics, metals, wood and stone reliably and with a high degree of strength

- at the press of a button, you yourself decide:
 - when the adhesive reacts and sets
 - how fast the adhesive reacts
 - how high the stiffness is to be
 - how hard the adhesive is to become
 - how elastic the adhesion will stay
- ideal for modelling, glass, acrylic, wood, porcelain, jewellery, metals, rubber, auto glass, insulation, waterproofing
- adhesion: < 3 sec.
- hardening < 30 sec.
- temperature resistance: max. -40°C to 120 °C
- shore hardness D: max. 55
- tensile strength: max. 200 kg/cm²
- viscosity 20°C: 2,500 - 5,000 mPa.s
- made in the EU

scope of delivery:

- superglue bottle 3g
- UV lamp
