

Fan Heater | electric | 15 kW

Product number: 73374

Weight: 21.056 kg

EAN: 4048769082321

- mobile heat source for continuous heating such as workshops, garages, construction sites, apartments and stores
- to support dehumidifiers for accelerated drying of buildings
- conveniently transportable and stable trolley design with ball bearing wheels
- with excellent heat output for indoor and outdoor use
- due to the high power equipped with a connection for three-phase alternating current (three-phase current)
- heating coil and powerful air flow provide fast heating over long distances with low noise level
- easy to transport and quickly stored due to its light weight and compact dimensions
- temperature limitation with automatic reset and overheating protection
- 2 heating levels (7500 / 15000 W) and fan operation
- clear control panel with adjustable thermostat
- swiveling heating element
- powder coated housing

- power supply: 380 - 400 V ~3 AC 50 Hz
- plug type: CEE three-phase connector according IEC 60309
- nominal heating power: 15000 W
- heating power steps: 7500 / 15000 W
- heater type: heating tube
- air flow volume: 1400 m³/h
- protection class: IPX4
- recommended usable area: 120 m²
- angle adjustment: 15°
- thermostat: mechanical / relay control system
- power cable / supply line not included in the scope of delivery!
